Needs

CESC

The Charlotte Education Services Consortium (CESC) is a family enterprise, established in 2013 to gradually transition siblings from public service engagements to the private provision of education and related products and services and voluntary service. In doing so, the siblings seek to honour the memory of their parents Brassington and Charlotte, who spent their lives teaching at the secondary and primary levels, respectively, leading and mentoring younger education professionals. The [University of the Southern Caribbean Professional Development Institute](#) serves as one of its platforms of delivery.

CESC is registered as an LLC in Guyana and Michigan, and with the Guyana National Accreditation Council. It benefits from the pooled expertise of over two hundred and fifty years of professional work in primary, secondary and tertiary education, child protection, gender, justice, defence, human rights, international development, and the pharmaceutical regulatory regime in the US and Europe. CESC works primarily in English but has the capacity to work in French, Portuguese, and Spanish, in selected workstreams. We hope that in our collaboration you find fulfillment.
